Professional Summary

Full-stack lead and GenAI application engineer who ships LLM-powered products end to end. 15+ years architecting and leading enterprise web platforms across MERN (6 Years) and LAMP (15+ Years). Expert in AI-Augmented Development, aggressively accelerating development cycles by writing production code via Claude, Google Gemini PRO 3, chatgpt (codex), cursor, windsurf, V0 and Bolt etc. Strong on LLM API integration, prompt engineering, retrieval/RAG, tool/function calling, MCP for automated agents for sending emails and Google Service Account key for instant indexing, and turning AI capabilities into reliable, paying-user features.

Technical Skills

GenAI & LLMs: Anthropic Claude, Google Gemini Pro (Google Antigravity), OpenAI, Tool/Function Calling, RAG, ChromaDB, Pinecone vectorDB, Prompt Engineering, Agentic Workflows.

Frontend: React.js, Next.js, React Native, Redux, Tailwind CSS, Bootstrap 5, jQuery, Material-UI, HTML5, Blade, Smarty, MUI, HTML5, CSS3, JavaScript (ES6+).

Backend: Node.js, Express.js, Laravel 8/9, CodeIgniter, Core PHP 7 & 8, REST APIs, SOAP, cURL, GraphQL-ready.

Databases: MySQL 8, MongoDB (Mongoose), Oracle 10g, SQL Server.

Cloud & DevOps: AWS (EC2, S3, CloudFront), Google Cloud Platform, Supabase, CI/CD Pipelines, Docker, Nginx, Apache, Linux Admin.

AI Dev Tools: Claude Opus 4.8 / Fabel 5, ChatGPT, Google Gemini Pro, v0, Bolt, Windsurf, Cursor — AI-driven coding & architecture.

Payment Integration and CMS: Stripe, PayPal, Razorpay, CCAvenue, PhonePe UPI, FedEx API, MakeMyTrip, SuiteCRM, QuickBooks, Clouduary.

Version Control: Git, Github, Bitbucket, SVN, CVS.

Methodologies: Agile / Scrum, SDLC, SRS & FS Documentation, PRD creation via google gemini, Code Review, Mentoring

CMS & Platforms: Shopify, Word Press, Quickbook, SuiteCRM, Chatbot integrations(Telegram, Viber,Line)

Linux Server Administration & Deployment: Experienced in deploying, configuring, and managing web applications on Linux-based VPS and cloud infrastructure. Skilled in handling end-to-end server setup, domain configuration, security hardening, and production deployments across multiple hosting providers.

Key Expertise:

- Deploy and manage applications on **AWS EC2**, **DigitalOcean Droplets**, **Hostinger VPS**, and other Linux-based cloud hosting platforms.
- Configure and administer **Ubuntu** and other Linux servers for production environments.
- Set up and manage **Apache HTTP Server** and **Nginx** web servers, including virtual hosts, reverse proxy, load balancing, and performance optimization.
- Perform **DNS configuration and domain mapping**, including A, AAAA, CNAME, MX, TXT, and NS records for seamless domain integration.
- Install, configure, and renew **SSL/TLS certificates** using **Let's Encrypt Certbot**, ensuring secure HTTPS communication.
- Configure reverse proxy for backend applications such as **Node.js**, **Laravel**, **PHP**, **Python**, and other web frameworks.
- Deploy full-stack web applications with automated service management using **Systemd**, **PM2**, and **Cron Jobs**.
- Troubleshoot server, networking, and deployment issues related to DNS propagation, firewall rules, SSL, web servers, and application availability.
- Configure server security using **UFW Firewall**, SSH key authentication, user permissions, and basic Linux hardening practices.
- Manage application environments, environment variables, file permissions, and server logs for reliable production deployments.
- Perform application updates, backups, monitoring, and maintenance to ensure high availability and optimal server performance.
- Experience integrating Git-based deployment workflows and maintaining CI/CD-ready deployment environments.

Professional Experience:

Full Stack Team Lead *Louder World Pty Ltd — New Delhi Sep 2024 – Present*

- Lead end-to-end MERN stack development for tixmojo.com (event-tech platform), migrated a legacy PHP codebase to a modern MERN architecture on 30th March 2026.
- Developed the Tixmojo Scanner mobile app (React Native) published on Google Play Store for real-time ticket validation.
- Championed AI-assisted development workflows using Claude, Cursor, and v0 — reducing feature development cycles by an estimated 70%.
- Managed CI/CD pipelines, DNS mapping, and multi-environment deployments on AWS and Hostinger.

AIResume (airesume.info) & Ushort (aipradit.xyz) *GenAI Engineer*

- Architected and deployed two production-grade GenAI platforms as personal portfolio projects to demonstrate advanced LLM integration and full-stack MERN capabilities.
- AIResume (airesume.info): A production GenAI SaaS on the MERN stack featuring an LLM chatbot assistant, grounded AI resume rewriting, JD-tailoring with match reports, ATS analysis, and dual-gateway payments (Razorpay, PayPal). RAG pipelines for career summary with pinecone vector DB and Interview Preparation via vector DB from stored career summary

and MCP for automate google ranking AI GSC indexing and sending emails when new users sign up. Dockerized and deployed via CI/CD.

- Ushort (aipradit.xyz): A highly scalable Bitly-style URL shortener SaaS with advanced link management and analytics on a modern MERN stack with Redis caching.

Technical Team Lead (Full Stack) *Wysylka Technologies Pvt Ltd — Ghaziabad* Feb 2021 – Sep 2024

- Architected and delivered matrixhrtech.com — a full-featured HR platform using React 18, Node.js 18, Express.js, MongoDB, and Redux with MUI.
- Built westpay.in, an online recharge platform for prepaid mobile, DTH, and data cards using CodeIgniter 3, MySQL, and cURL-based payment integrations.
- Developed vantageshipbrokers.com, a ship-brokerage portal covering crude and fuel oil markets across Asia.

Team Lead (Full Stack) *Kliento Technologies — Noida* Dec 2017 – Jan 2021

- Delivered skinocare.co.in — a tele-dermatology platform serving tier-2/3 Indian cities; MERN stack with AWS deployment.
- Built DateLineHealthAfrica.org using Laravel 8, Bootstrap 5, and jQuery.
- Developed Minderlaw.com — an international trademark registration platform serving clients across the US, EU, and China.

Senior Software Engineer *My GuestHouse Accommodations Pvt. Ltd — Noida* May 2013 – Dec 2017

- Engineered mghworld.net — a property management platform aggregating hotels across India.
- Implemented live inventory APIs integrating with MakeMyTrip, TravelGuru, and Hotwire for real-time room availability.

Senior Web Developer *VCare Corporation — Noida* Jul 2010 – May 2013

- Developed canadacallhome.com — a VoIP calling platform integrating VOIP, SOAP, and XML protocols.
- Built reachoutmobile.com — a US government-assisted free mobile phone portal with address verification APIs.

Software Engineer *Intersoft Data Labs Ltd — Gurgaon* Jan 2006 – Jul 2010

- Developed modules for 4medica.com — a clinical information exchange platform using PHP 5, Oracle, and SOAP.
- Gained one year of on-site client experience in Georgia, Europe, strengthening global delivery capabilities.

Junior Developer *Acumen Software — New Delhi* Oct 2004 – Jan 2006

- Built Cosmo Tourist (Hyperion) — a travel portal for a Germany-based client (formerly Lycos), using PHP and Smarty Templates.
- Developed a B2C Online Auction Platform from scratch enabling bidding, listing, and transaction workflows.

Education:

MCS (Master of Computer Science) *J.K. Institute of Applied Physics & Technology, University of Allahabad* 1999 – 2001

B.Sc. (Physics, Mathematics, Chemistry) *University of Allahabad* 1995 – 1998

Public Projects / GitHub:

tiny-tool-agent: github.com/pradeep4j/tiny-tool-agent — a framework-free tool-calling AI agent using the Google Gemini SDK demonstrating the raw ReAct loop without LangChain.
